EDUCATION

Central University of Rajasthan

B.Tech in CSE

2020-24 | Grade: 8.22

S.C.A.Memorial Senior Secondary School

12th Std. | PCM, 95.0%

SKILLS

Languages:

Java, JavaScript, Python, C

Frameworks:

ReactJS, NodeJS, ExpressJS,
React-Redux, Docker, Selenium

Databases:

MongoDB, MySQL

Tools:

Git, Postman, Linux, Stripe, Jira

Soft Skills:

Leadership, Time Management,
Collaborative

CourseWork:

OS, Computer Networks, OOPs,
Machine Learning, LLM

HOBBIES

Chess, Badminton

EXPERIENCE

Bobble AI

Software Developer Intern

Gurugram

May 2024 – Nov 2024

- Migrated a legacy scraping dashboard to ReactJS, improving performance and scalability, and automated data integration across multiple advertising dashboards using Docker and CI/CD pipelines.
- Containerized and deployed automated scripts for data retrieval and reporting, ensuring scalability, reliability, and real-time campaign performance tracking.
- Fine-tuned the Llama3.1 model for the Bubbly Chat project, enhancing conversational AI capabilities and user interaction experience

PROJECTS

Pizza Khalo

singhal0306/pizza-khalo

MERN Stack, React-Redux, Stripe Payment Gateway, Bootstrap

- Pizza Khalo, an innovative MERN stack application facilitating on-line pizza orders. Integrated React and Redux for a responsive user interface and streamlined state management.
- Implemented secure payment processing through Stripe. Orchestrated server-side operations with Node.js and Express, utilizing MongoDB for robust data management.

Interactify

singhal0306/Interactify

NodeJS , ExpressJs , MySql , Handlebars , TailwindCSS

- Interactify combines a sleek user interface with powerful features, setting it apart as a modern and engaging social networking experience with NodeJs.
- Architected a robust backend system using NodeJs and ExpressJs with database in MySql.
- Employed Handlebars as the templating engine for the frontend, enabling the creation of dynamic and responsive user interfaces.

Inventory System singhal0306/inventory-sales-management

ReactJS , Tailwind CSS, ExpressJS, NodeJS, MongoDB

- Designed and developed an inventory and billing system using the MERN stack, enabling efficient management of inventory and seamless billing operations.
- Implemented real-time data synchronization across the system, ensuring accurate stock tracking and up-to-date billing information for improved business operations.
